

Paper permits belong in the past.

Structured, auditable digital permit-to-work platform covering nine permit types. Every permit includes ISO 31000 risk assessment, PPE checklists, LOTO isolation points, method statements, and digital authorisation signatures with full audit trail.

General Work Permit — permit details, work area, contractor, workers, and rescue plan

Eliminate Paper

No illegible forms or lost permits. Every field validated. Digital archive replaces filing cabinets.

Reduce Incidents

Mandatory sections ensure nothing is skipped. Risk assessment and controls documented before work.

Audit-Ready

Timestamped records. Searchable register for DoL inspections and SHEQ audits.

Save Time

Issue a permit in minutes. Hazard libraries and method statement templates eliminate repetition.

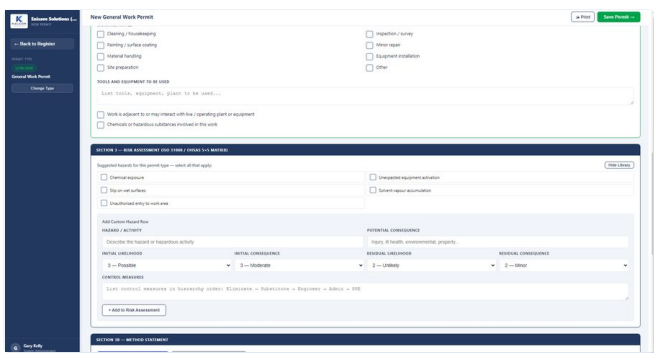

NINE PERMIT TYPES

Every high-risk activity covered

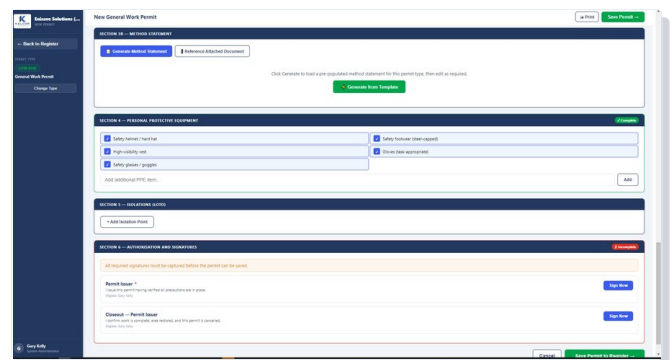

- ✓ Hot Work Permit — HIGH RISK — welding, cutting, grinding near combustibles
- ✓ Confined Space Entry — CRITICAL RISK — tanks, vessels, manholes
- ✓ Electrical Work — HIGH RISK — work on or near energised equipment
- ✓ General Work — LOW RISK — maintenance, cleaning, site preparation
- ✓ Cold Work — LOW RISK — non-sparking mechanical work
- ✓ Working at Height — MEDIUM RISK — scaffolding, ladders, elevated platforms
- ✓ Excavation — MEDIUM RISK — trenching, ground penetration
- ✓ Line Breaking — HIGH RISK — opening pipework, process connections
- ✓ Radiation Work — CRITICAL RISK — radiography, sealed sources

BUILT INTO EVERY PERMIT

- ✓ ISO 31000 / OHSAS 5x5 risk matrix with suggested hazards per permit type
- ✓ PPE checklist — mandatory and optional items, task-appropriate selection
- ✓ LOTO isolation points — equipment identification and lock-out verification
- ✓ Method statement — generate from template or reference attached document
- ✓ Digital authorisation — Permit Issuer, Permit Receiver, Closeout signatures

Risk assessment and work activity checklist

PPE, LOTO, and digital signatures
